

Healthy Air™

SOURCE CAPTURE VENTILATION SYSTEM FOR NAIL SALONS:
draws air away from the manicurists and clients, keeping the breathing area free of hazardous chemicals.

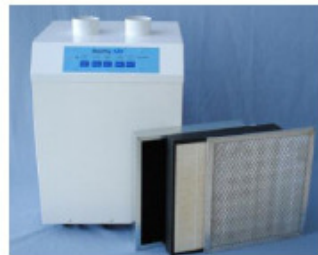

Features of the unit:

- compact size
- quiet operation
- high volume
- portable with two inlets
- 3 speed high flow fan (down flow for low noise)
- electronic control panel w/ remote wireless control

- quick access for filter change

- prefilter for dust particle
- eHEPA for finest particles
- activated carbon filter to aid hazardous chemical removal

- eHEPA technology w/ advanced chemical absorption and catalytic oxidation

- double extraction arm with fume capturing nozzle

- available in single extraction

- optional table mount nozzle
- other extraction arms and hoods available

For Inquires, please contact us at: Toll Free: 1-800-288-2023 E-mail: Info@aerovexsystems.com

PROBLEM:

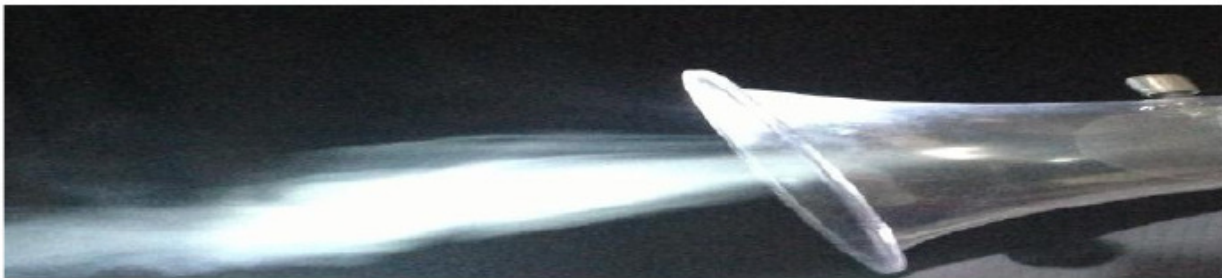

Nail Salon Workers and Clients are Potentially Exposed to Unsafe Amounts of Chemical Vapors

Nail products like nail polish, polish removers and artificial nail products create vapors and dusts. Overexposure can cause "sensory irritation" and long term overexposure may result in occupational asthma or other health complications. Nail salon workers are particularly at risk for overexposure, as they work with these products every day and often in poorly ventilated spaces.

SOLUTION:

Capture the Chemical Vapor and Dust from the Breathing Zone

Aerovex Systems' Nail Source Capture System utilizes **HealthyAir™** technology to capture the manicuring vapors and dust particles at the source and extract them from the breathing zone.

HealthyAir™ Technology

HealthyAir™ One of the Most Powerful and Effective Advanced Air Purification Systems in the World that uniquely designed to combine the eHEPA technology with advance activated carbon filtration

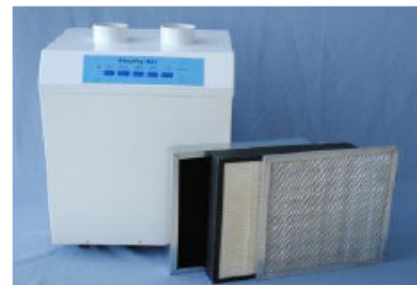

HealthyAir™ utilizes an advanced eHEPA technology to capture submicron airborne particles as well as microorganisms such as bacteria, viruses, mold and fungi, with efficiencies exceeding standard HEPA grade filters, and kill these microorganisms at extremely high kill rates, with the application of the energy field that permeates through the filter media.

HealthyAir™ utilizes an advanced granular activated carbon filter in combination with the energy field to provide sufficient dwell time to effectively adsorb/decompose VOCs and odor.

HealthyAir™ utilizes down flow centrifugal fan for exceptionally quiet operation.

Specifications:

Model:	HA-2110-NS		
Voltage/Frequency:	120V/60Hz		
Three Fan Speeds:	High	Med	Low
Power Consumption	125	100	80
CFM (cubic feet minute):	200	175	150
Operation Noise (dB):	56	52	51
Dimensions (L x W x H):	14" x 16" x 22"		
Weight	45 lbs.
