- Sound SF: 45 dB Level:
- Voltage/ SF: Input DC 12V, 1.25A Power: Max, CE listed 135 CFM
- Dimensions: SF: Head: 9.25", Head top diameter: 131mm (5.16")
- Weight: SF: 5.25LB
- ReplacementSunflower Filters: 5Filter:Pack

Compact nail dust collector which also extracts light vapors - Wheeled Stand allows for easy mobility

• The Sunflower II LED Nail Dust Collector is a compact, yet powerful, dust collector which also extracts light vapors from UV Gel Polish to protect the breathing zone of manicurists and their clients. The Sunflower II uses HEPA-quality filtration with activated carbon technology. The filter is composed of three layers: the inner and outer layers capture dust and the middle carbon filter absorbs odors such as Cyanoacrylate Monomer Vapors found in eyelash glue.

- The *Sunflower II* uses HEPA-quality filtration with activated carbon technology. The filter is composed of three layers: the inner and outer layers capture dust and the middle carbon filter absorbs odors.
- The powerful LED allows for ideal illumination of the workstation. The portable Sunflower II comes with 2 filters and an easily adjustable base with a clamp mount.
- The Sunflower comes with a clamp and two filters.
- Other accessories sold separately: Hole-through Mount, Screw-On Base, Suction Cup Mount, Inner Filter.
- The Sunflower II LED Dust Collector is a high-powered, yet quiet entry-level source capture system. This compact, portable unit also extracts light vapors/fumes emitted from UV Gel Polish to protect the breathing zone of manicurists and their clients.
