

Healthy Air Ceiling Mount Air Purifier System Frequently Asked Questions

Q. Do I have to connect this unit to the outside?

A. The Healthy Air Ceiling Mount Nail System can be installed as a recirculating ventilation or as an outside ventilation system. If you choose to recirculate, the Ceiling Mount system is designed to efficiently make use of Coanda airflow to ensure that purified, conditioned, air is re-circulated evenly throughout the room.

Q. How Big is this unit?

A. The approximate weight and dimensions of the unit is: 65 lbs. - 24"l x 24"w x 15"h

Engineered for easy installation, this unit mounts perfectly flush, and blends, with any drop ceiling with a standard 2'x2' panel arrangement and a minimum clearance of 18". This unit may also be installed in other recessed structures, including walls, with adequate space and ventilation.

Q. What filter do I need to replace and how often should I change it?

A. You will need the 1219 (CM) replacement filter. The recommended filter replacement cycle is every 6 months on average. However, the need for filter replacement depends on the frequency and nature of use.

Q. What is eHEPA® Technology?

eHEPA® Technology is a patented eHEPA® technology, this unit effectively filter air in a highly efficient and innovative 3-stage process, resulting in a safer work environment with a healthier breathing zone for occupants.

As contaminated air passes through the unit, the Pre-Filter, eHEPA® Filter, and Enhanced Carbon Catalytic Filter work in conjunction to collect and deactivate airborne particles; including dust, smoke, allergens, gasses, odors, and VOCs.

HealthyAir® System 3-stage process collectively utilizes the 5 filtration methods of Sieving, Direct impact, Inertial Impaction, Diffusion, and Electrostatic.
