

Healthy Air Ceiling Mount Nail Salon Source Capture System Frequently Asked Questions

Q. Do I have to connect this unit to the outside?

A. The Healthy Air Ceiling Mount Nail System can be installed as a recirculating ventilation or as an outside ventilation system. If you choose to recirculate, the Ceiling Mount system is configured to efficiently pull in contaminated air through the hose, filter contaminants and discharge purified air from the exhaust vent.

Q. How Big is this unit?

A. The approximate weight and base dimensions of the unit is: 90 lbs. - 24"l x 24"w x 15"h

Engineered for easy installation, this unit mounts perfectly flush, and blends, with any drop ceiling with a standard 2'x2' panel arrangement and a minimum clearance of 18".

The standard extraction arm hose length is 7' and is designed for salons with a ceiling height of approximately 10'. Custom length hose is available, for information and pricing please contact us.

Q. What filter do I need to replace and how often should I change it?

A. You will need the 1219 (CM) replacement filter. The recommended filter replacement cycle is every 6 months on average. However, the need for filter replacement depends on the frequency and nature of use.

Q. What are the benefits?

- The clean air output of each system can be applied to the total 0.6 CFM/ft² that is required to be exhausted from overall salon air, which in turn conserves energy
- Prevents contaminated air from re-entering the salon and/or entering adjacent environments, including neighboring businesses or residences
- Prevents nail dust from accumulating in duct-work and creating potential hazards
